

Stream No. 13 (2 notices)

East side Eaglek Bay

Width: 9 feet

Depth: 3 inches.

Has a fine gravel bottom. Break up about 600 feet above high tide line. Goes dry at low tide 1/4 mile back from high tide mouth.

Sept. 11, 1926: 2,000 fish spawned here. Only a few live fish observed at this time.

1927: No visit. Estimate allowed for.

Stream No. 14 (1 notice)

East side head Eaglek Bay.

There is a lagoon here, then 1/4 mile of tidal stream through a canyon, then a lake covering an area of about 35 acres. Salt water backs into this lake on a very high tide. Considerable seepage water enters the lake on the south side. One stream near its head is 12 feet wide and 6 inches deep, but near the lake it disappears under the gravel.

Sept. 12, 1926: Saw 25 reds alive and dead, 50 silvers, and evidence to justify an estimate of 3,000 humps and dogs.

1927: No visit. Estimate allowed for.

Stream No. 15 (2 notices)

West side head Eaglek Bay.

A large glacier stream here but no fish in it. On each side of it there are two small clear-water streams also with fish in them, but they do not hold out for more than 800 feet above high tide line in the four small ones. Good bottom in all.

Sept. 12, 1926: About 2,000 fish, mostly dead.

1927: No visit. Estimate allowed for.

Stream No. 16 (1 notice)

West side Eaglek Bay.

Width: 20 feet

Depth: 6 inches.

A falls in stream at high tide line, falls being too high for humps. About 1/2 mile further up a higher falls, about 20 feet.

No fish in stream above first falls. Stream bed around mouth is

Stream No. 16 cont'd

rather coarse flatish rocks. Two other very small streams under same marker. The bay goes dry at low tide for a distance of 1,000 feet.~~xx~~

Sept. 12, 1926: 1,000 fish for all streams.

1927: No visit. Estimate allowed for.

Stream No. 17 (No marker)

Esther Passage Red Lake.

There is a small lake here and a few reds go into it.

1927: No visit. Estimate allowed for.

Stream 18A

Esther Passage.

Small and short.

Aug. 10, 1927: 1,750 fish.

Stream No. 18 (2 notices)

Esther Passage, east side.

There are 3 streams here: One about 30 feet wide and 10 inches deep, accessible 1,000 feet above high tide line; the others about 12 feet wide and 4 or 5 inches deep, accessible about 500 feet. All have good gravel bottom, the large one a little coarse.

Aug. 11, 1926: About 5,000 fish spawned here, humps and dogs.

Aug. 10, 1927: 3,500 fish.

Stream No. 18B

Esther Passage.

Small and short.

Aug. 10, 1927: 1,300 fish.
